INDEPENDENT AUDITORS' REPORT

To the Shareholders of Clearview Resources Ltd.

Opinion

We have audited the financial statements of Clearview Resources Ltd. (the "Company"), which comprise:

- the statements of financial position as at December 31, 2020 and December 31, 2019
- the statements of operations and comprehensive loss for the periods then ended
- the statements of changes in shareholders' equity for the periods then ended
- the statements of cash flows for the periods then ended
- and notes to the financial statements, including a summary of significant accounting policies.

Hereinafter referred to as the "financial statements".

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2020 and December 31, 2019, and its financial performance and its cash flows for the periods then ended in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the ***"Auditors' Responsibilities for the Audit of the Financial Statements"*** section of our auditors' report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KPMG LLP is a Canadian limited liability partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Other Information

Management is responsible for the other information. Other information comprises the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions as at the date of this auditors' report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditors' report.

We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

KPMG LLP is a Canadian limited liability partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

www.kpmg.ca

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

  The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

See accompanying notes to the financial statements

1. Nature of operations

Clearview Resources Ltd. ("Clearview" or "the Company") is a privately owned, crude oil and natural gas company, engaged in the acquisition, exploration, development and production of crude oil and natural gas from properties located in the province of Alberta, Canada. The Company's corporate head office address is located at 2400, 635 – 8th Ave. SW, Calgary, AB T2P 3M3.

2. Basis of preparation

Statement of compliance and authorization

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") as set forth in Note 3.

The financial statements were approved and authorized for issuance by the Board of Directors on April 29, 2021.

Reporting entity

The Company conducts many of its activities jointly with other parties. Consequently, these financial statements reflect only the Company's proportionate interest in such activities. The financial statements of the Company comprise the Company only as it has no subsidiaries or other interests to be consolidated.

Basis of measurement

The financial statements have been prepared on an historical cost basis, except for certain financial and non-financial assets and liabilities, which have been measured at fair value.

Functional and presentation currency

The financial statements are presented in Canadian dollars, the Company's functional currency and rounded to the nearest thousand dollars (unless stated otherwise).

Use of estimates and judgment

The preparation of financial statements in conformity with IFRS requires management to make estimates and use judgment regarding the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the period. By their nature, estimates are subject to measurement uncertainty and changes in such estimates in future periods could require a material change in the financial statements. Accordingly, actual results may differ from the estimated amounts as future confirming events occur. Estimates and their underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period of revision and in any future years affected.

Impact of COVID-19

In March 2020, the World Health Organization declared a global pandemic following the rapid spread of a novel strain of the coronavirus ("COVID-19"). The outbreak and subsequent measures enforced to limit the spread of the pandemic contributed to volatility in financial markets. The pandemic has adversely impacted global trade, including significantly reducing worldwide demand for oil and natural gas.

The full extent of the impact of COVID-19 on the Company's operations and future financial performance, including the recoverable amounts of exploration and evaluation assets and property, plant and equipment, is currently unknown. It will depend on future developments that are uncertain and unpredictable, including the duration and spread of COVID-19, the global roll-out of a vaccine and the continued impact of the virus on financial markets.

The outbreak and current market conditions have increased the complexity of estimates and assumptions used to prepare the financial statements, particularly related to recoverable amounts. There is a high degree of uncertainty regarding the estimates and assumptions used in determining recoverable amounts including future crude oil and natural gas commodity prices, foreign exchange rates, discount rates and the Company's future production of crude oil and natural gas. As the understanding of the longer-term impacts of COVID-19 develop, the estimates and assumptions used in determining the recoverable amounts could change and there could be a material financial affect in future periods.

Significant estimates and judgments made by management in the preparation of these financial statements are outlined below:

Business combinations

The initial recognition of business combinations requires management judgment in making key assumptions and estimating fair values in determining the purchase price allocation to the identifiable assets, liabilities and contingent liabilities for each acquisition or combination.

Cash-generating units ("CGU")

The Company's assets are aggregated into CGUs for calculating impairment. Cash-generating units are determined based on the smallest group of assets that generate cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets. Determination of CGUs is subject to management's judgment and is based on geology, geographical proximity, shared infrastructure, similar exposure to market risk and how management monitors its operations. The asset composition of the Company's CGUs could change due to new information and circumstances.

Impairment

Judgement is required to assess when indicators of impairment or impairment reversal exist and testing for the recoverability of assets is necessary. Determining the recoverable amount of assets, in the absence of quoted market prices, is based on the estimates of reserves, production rates, future oil and natural gas prices, future costs, discount rates and other relevant factors. The key estimates used in the determination of cash flows from crude oil and natural gas assets are outlined below:

Reserves – Assumptions that are valid at the time of the reserve estimation may change significantly when new information becomes available. Changes in forward price estimates, production levels or results of future drilling may change the economic status of reserves and may result in reserves being revised.

Oil and natural gas prices – Forward price estimates are used in the cash flow model. Commodity prices can fluctuate for a variety of reasons including supply and demand fundamentals, access to facilities and pipelines, inventory levels, exchange rates, weather and economic and geopolitical factors.

Operating, royalty and capital costs – Future operating, royalty and capital costs are used in the cash flow model, based on an analysis of actual costs incurred in recent years and then escalated for assumed future inflation. Actual results in the future may vary considerably from these estimates.

Discount rate – The discount rate used to calculate the net present value of cash flows is based on estimates of a discount rate specific to the risk of the CGU being assessed for impairment. Changes in the general economic environment could result in significant changes to this estimate.

Reserve estimates also have a financial effect on depletion expense and decommissioning obligations. The reserve estimates are evaluated by third-party reserve evaluators at least annually, who work with information provided by the Company to establish reserve amounts in accordance with National Instrument ("NI" 51-101, Standards of Disclosure for Oil and Gas Activities). Changes in circumstances may impact these estimates which could have a material effect in future periods.

Deferred tax assets

At the end of each reporting period, judgment is required by the Company in determining the likelihood of whether the deferred tax assets will be realized from future taxable earnings. Deferred taxes are based on estimates as to the timing over which temporary differences will reverse, substantially enacted income tax rates applicable to future years and the likelihood of assets being realized. The estimate of future capital activities can impact the timing of the reversal of any temporary differences.

Tax interpretations, regulations and legislation in the various jurisdictions in which the Company operates are subject to change. As such, income taxes are subject to measurement uncertainty.

Decommissioning obligations

Amounts recorded for decommissioning obligations require the use of estimates with respect to the amount and timing of decommissioning expenditures and discount rates. Actual costs incurred can differ from estimates due to public expectations, changes in laws and regulations, market conditions, discovery and analysis of site conditions and changes in technology.

Financial instruments

The estimated fair values of derivative financial instruments resulting in financial assets and liabilities, by their very nature, are subject to measurement uncertainty. Estimates of the mark-to-market value of the financial instruments at the end of each reporting period are subject to change based on changes in the

forward price curves of commodities and interest rates.

Stock based compensation

The estimated fair value of stock options uses pricing models such as the Black-Scholes model which is based on assumptions such as the life of the option, dividend yields, interest rates, volatility and forfeiture rates. Judgement is required by management in determining these assumptions.

Lease obligations

Lease obligations are estimated using the rate implicit in the lease, unless this rate is not readily determinable, in which case a discount rate equal to the Company's incremental borrowing rate is used. This rate represents the rate that the Company would incur to obtain the funds necessary to purchase an asset of a similar value, with similar payment terms and security in a similar economic environment. Lease terms are based on assumptions regarding extension terms and renewal options that allow for operational flexibility and future market conditions.

Liquidity

As part of its capital management process, the Company prepares budgets and forecasts, which are used by management and the Board of Directors to direct and monitor the strategy, ongoing operations and liquidity of the Company. Budgets and forecasts are subject to significant judgement and estimates relating to activity levels, future cash flows and the timing thereof and other factors which may or may not be within the control of the Company. See further discussion related to liquidity in Note 15.

3. Significant accounting policies

The accounting policies set out below have been applied consistently by the Company to all periods presented in these financial statements other than as disclosed herein.

Jointly owned assets

The Company's oil and natural gas activities consist of jointly owned and operated assets, which are not conducted through separate vehicles. The financial statements include the Company's share of these jointly owned assets, liabilities, revenue and expenses.

Exploration and evaluation assets

Costs incurred before acquiring the legal right to explore in a specific area do not meet the definition of an asset and therefore are expensed as incurred.

Exploration and evaluation assets consist of expenditures incurred in an area pending the determination of technical feasibility and commercial viability. Exploration and evaluation expenditures, including the costs of acquiring mineral rights, drilling exploratory wells and other directly attributable costs are capitalized and accumulated in cost centres.

The technical feasibility and commercial viability of extracting a mineral resource is considered to be determinable when proved and probable reserves are determined to exist and are capable of

production. A review of each cost centre is carried out, at each reporting period, to ascertain whether economic proved and probable reserves have been discovered. Upon determination of proved and probable reserves, exploration and evaluation assets attributable to those reserves are tested for impairment and then reclassified to property, plant and equipment. If an exploration and evaluation asset is determined to be unsuccessful, all associated costs are charged to the statement of operations. Assets classified as exploration and evaluation are not subject to depletion and depreciation until they are reclassified to property, plant and equipment.

Property, plant and equipment

Property, plant and equipment is carried at cost less accumulated depletion and depreciation and accumulated impairment losses. The cost of oil and natural gas assets includes: the cost of acquisitions, the costs to drill a well and the costs of the associated land upon determination of technical feasibility and commercial viability; the cost to complete and tie-in the wells; facility costs; the estimated cost of asset retirement; geological and geophysical costs; and directly attributable internal costs.

Gains and losses on disposal of an item of property, plant and equipment, including oil and natural gas interests, are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and are recognized in earnings.

Subsequent costs

Expenditures related to renewals or betterments that improve the productive capacity or extend the life of an asset are capitalized. Maintenance and repairs are expensed as incurred.

Depletion and depreciation

The net carrying value of the oil and natural gas assets is depleted using the unit of production method based on estimated proved plus probable reserves, including estimated future development costs necessary to bring those reserves into production. Capitalized plant turnaround costs are depreciated on a straight-line basis over the estimated time until the next turnaround is completed.

Impairment

Financial assets

The Company recognizes loss allowances for expected credit losses (“ECL”) on its financial assets measured at amortized cost. Due to the nature of its financial assets, the Company measures loss allowances at an amount equal to expected lifetime ECLs. Lifetime ECLs are the anticipated ECLs that result from all possible default events over the life of a financial asset. ECLs are a probability-weighted estimate of credit losses and are discounted at the effective interest rate of the related financial asset.

Non-financial assets

Exploration and evaluation assets are assessed for impairment when they are transferred to property, plant and equipment or if facts and circumstances suggest that the carrying amount exceeds the recoverable amount. For purposes of impairment testing, E&E assets are allocated to their related cash-generating unit ("CGU"). The carrying amounts of property, plant and equipment are reviewed at each reporting date to determine whether there is any indication of impairment or impairment reversal. If any such indication exists, then the recoverable amount of each CGU is estimated at the greater of its value in use (VIU) and its fair value less costs to sell (FVLCTS).

FVLCTS is estimated based on the discounted present value of the future cash flows generated by the CGU, including development prospects. The future cash flows are those estimated for proved plus probable reserves using forecast prices and costs as prepared by the Company's independent qualified reserves evaluator. The discount rate is the rate likely to be applied by an independent market participant. The Company may also consider an evaluation of comparable asset transactions. VIU is estimated based on the discounted present value of the future cash flows from proved and probable reserves using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognized in earnings if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount.

An impairment recovery is recognized in earnings if there has been a subsequent increase in the estimate of the recoverable amount following the recognition of an impairment loss in prior periods. The reversal of prior impairment is recognized only to the extent of the increase in the estimated recoverable amount or the asset's carrying amount, net of depletion, that would have resulted had no impairment loss been recognized on the asset in prior periods.

Assets held for sale

Non-current assets are classified as held for sale if their carrying values will be recovered through a sale transaction rather than through continuing use. This condition is met when the sale is highly probable and the asset is available for immediate sale in its present condition. For the sale to be highly probable, management must be committed to a plan to sell the asset and an active program to locate a buyer and complete the plan must have been initiated. The assets must be actively marketed for sale at a price that is reasonable in relation to its current fair value and the sale should be expected to be completed within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of the carrying value and fair value less costs to sell, with impairments recognized in earnings in the period measured. Non-current assets held for sale are presented in current assets and current liabilities within the statement of financial position. Assets held for sale are not depleted, depreciated or amortized.

Decommissioning obligations

Decommissioning obligations are recognized in the period in which a well or related asset is drilled, constructed or acquired, based on the discounted present value of estimated future costs to abandon and reclaim oil and natural gas properties. The future cash flows are discounted using a pre-tax risk-free rate and this amount is initially capitalized as part of the carrying amount of the related property, plant

and equipment with a corresponding liability being recognized at the same time. The capitalized amount is depleted on the unit of production method on the same basis as the related asset while the liability is accreted to earnings until it is settled or sold. Changes in the estimated liability resulting from revisions to discount rates, expected timing or future asset retirement costs, are recognized as a change in the related asset and the asset retirement liability. Actual costs incurred upon settlement of the asset retirement obligations are charged against the provision.

Revenue

The Company primarily generates revenue from the sale of commodities, which include crude oil, natural gas and natural gas liquids. Revenue from the sale of commodities is recognized when control is transferred from the Company to its customer. This transfer is generally at the point in time the customer takes legal possession of the product through the physical transfer of the product at the delivery point agreed with the customer, generally pipelines or product receipt terminals. The revenue is measured based on the consideration specified in the contracts with customers. Payment terms for the sales contracts are on the 25th day of the month following delivery.

Clearview evaluates its arrangements with third parties and partners to determine if the Company acts as the principal or as an agent. Clearview is considered the principal in a transaction when it has primary responsibility for the delivery of the product. If Clearview acts as an agent rather than as the principal in a transaction, then the revenue is recognized on a net-basis, only reflecting the fee, if any, realized by the Company for the transaction.

Fees charged to other entities for use of facilities owned by the Company are evaluated to determine if the fees originate from contracts with customers or from incidental or collaborative arrangements. Fees charged to other entities that are from contracts with customers are recognized in revenue when the related services are provided. The Company does not take ownership of the third-party production volumes while being processed through its facilities.

Royalty income is recognized as it accrues in accordance with the terms of the overriding royalty agreements.

Stock based compensation

The fair value of stock based compensation is determined at the grant date using the Black-Scholes option-pricing model and is recognized over the vesting period of the options as stock based compensation expense and contributed surplus. Upon the exercise of the stock option, consideration together with the amount previously recognized in contributed surplus, is credited to share capital. A forfeiture rate is estimated on the grant date and is subsequently adjusted to reflect the actual number of options that vest.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. All financial instruments, including derivatives, are recognized on the statement of financial position at fair value at the time the Company becomes a party to the contract. Subsequently, all financial assets and liabilities, except financial assets and liabilities carried at fair value through earnings, are measured at amortized cost determined using the effective

interest method. Financial assets and liabilities carried at fair value through earnings or loss are measured at fair value with changes in fair value recognized in earnings.

Transaction costs attributable to financial instruments carried at fair value through earnings or loss are expensed as incurred. All other transaction costs related to the Company's financial instruments are recorded as part of the instrument and are amortized using the effective interest method.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has the legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire or if it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risk and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability. The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expired.

The Company has a risk management program whereby the commodity price associated with a portion of its future production volumes is fixed in order to mitigate cash flow volatility resulting from fluctuating commodity prices. The Company sells forward a portion of its future production volumes by entering into a combination of physical sale contracts with customers and derivative financial contracts such as fixed price contracts, costless collars or the purchase of floor price options with financial counterparties. These instruments are not used for trading or speculative purposes.

The Company has also entered into interest rate forward contracts to reduce the volatility of variable interest rates on a portion of its debt to fixed interest rates for a period of time.

The Company has not designated its financial derivative contracts as effective accounting hedges and thus has not applied hedge accounting. As a result, financial derivatives are classified as fair value through earnings or loss and are recorded on the statement of financial position at fair value.

The Company accounts for its physical commodity sales and purchase contracts, which were entered into and continue to be held for the purpose of receipt or delivery of non-financial items in accordance with its expected purchase, sale or usage requirements as executory contracts. As such, these contracts are not considered to be derivative financial instruments and have not been recorded at fair value on the statement of financial position. Settlements on these physical sales contracts are recognized in crude oil and natural gas sales.

Convertible debentures

Convertible debentures are a non-derivative financial instrument that create a financial liability of the Company and grant an option to the holders of the instrument to convert it into common shares of the Company. The liability component of the debentures is initially recorded at fair value of a similar liability that does not have a conversion option. The equity component is recognized initially, net of deferred income taxes, as the difference between gross proceeds and the fair value of the liability component. Transaction costs are allocated to the liability and equity components in proportion to the allocation of proceeds. Subsequent to the initial recognition, the liability component of the debentures is measured at

amortized cost using the effective interest rate method and is accreted each reporting period such that the carrying value will equal the principal amount outstanding at maturity. The equity component is not re-measured. If any of the liability component are converted into common shares, a portion of the conversion feature included in equity and the liability component converted will be reclassified to common shares.

Share capital

Common and preferred shares are classified as equity. Incremental costs directly attributable to the issue of shares are recognized as a deduction from equity, net of any tax effects.

Flow-through shares

Resource expenditures for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. A liability is recognized for the premium on the flow-through shares and is subsequently reversed as the Company incurs qualifying expenditures. Any difference between the liability set up for the premium on the flow-through shares and the tax effect on the renounced expenditures is recognized in earnings.

Per share amounts

Basic per share information is calculated based on the weighted average number of common shares outstanding during the year. The diluted weighted average number of shares is adjusted for the dilutive effect of stock options, deferred share units and convertible debentures. Diluted per share amounts are calculated using the treasury method. The treasury method assumes that the proceeds from the exercise of stock options are used to repurchase common shares at the average market price during the year. For convertible debentures, interest associated with the convertible debentures would be added back to earnings and the common shares issued upon conversion would be added to the common shares outstanding. Anti-dilutive stock options, deferred share units and convertible debentures are not included in the calculation.

Business combinations

Business combinations are accounted for using the acquisition method. The identifiable net assets acquired are measured at their fair value at the date of acquisition. Any excess of the fair value of the consideration transferred over the fair value of the net assets acquired is recognized as goodwill. Any deficiency of the fair value of the consideration transferred below the fair value of the net assets acquired is recorded as a gain on acquisition through earnings. Transaction costs associated with the acquisition are expensed when incurred.

Leases

Leases or contractual obligations are capitalized as right of use assets with a corresponding lease obligation on the statement of financial position calculated as the present value of future lease payments. The effective interest method is applied to the lease and the right of use asset is depreciated over the term of the lease. The discount rate used to determine the present value of future lease

payments is the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate. Certain lease payments will continue to be expensed through earnings. These types of leases would be short-term leases equal to or less than twelve months, variable lease payments, leases for the purpose of oil and gas extraction or leases whereby the underlying asset is of low value.

Income taxes

Income tax expense is comprised of current and deferred tax. Income tax expense is recognized in earnings except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized on the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Government grants

Government grants are recognized when there is reasonable assurance that the grant will be received and all conditions associated with the grant are met. When the conditions of a grant relate to income or expense, it is recognized in earnings in the period in which the expenditures are incurred or income is earned. When the conditions of a grant relate to an underlying asset, it is recognized as a reduction to the carrying amount of the related assets and amortized into income through depletion and depreciation.

New accounting standards

Business combinations

On January 1, 2020, the Company adopted the amendments to IFRS 3, “Business Combinations”, to clarify whether a transaction results in an asset acquisition or a business acquisition. The amendments include an election to use a concentration test. This is a simplified assessment that results in an asset acquisition if substantially all of the fair value of the gross assets are concentrated in a single identifiable asset or a group of similar identifiable assets. If the concentration test is not applied, or the concentration test fails, then the assessment focuses on the existence of a substantive process. The standard has been applied prospectively. No business combinations were completed during the year ended December 31, 2020.

Future accounting pronouncements

On January 23, 2020, the International Accounting Standards Board announced an amendment to IAS 1 “Presentation of financial statements re; classification of liabilities as current or non-current which is effective for annual periods beginning on or after January 1, 2023. The amendment clarifies that the classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period. The Company does not plan to early adopt these amendments.

4. Acquisitions and dispositions

(a) Acquisition of assets

During the year ended December 31, 2020, the Company acquired partner working interests of jointly owned assets in 9 gross (3.5 net) wells in its Central Alberta Oil CGU. The partners paid Clearview $0.3 million to acquire their working interests, as the cost of decommissioning obligations assumed of $0.3 million exceeded the value of the assets.

In the prior year ended December 31, 2019, the Company acquired partner working interests of jointly owned assets in its Central Alberta Gas CGU for cash consideration of $16 thousand.

(b) Acquisition of Private Co. properties

On February 22, 2019, Clearview acquired producing oil and gas assets and undeveloped land from a private oil and gas producer (“Private Co”) for cash consideration of $0.6 million and the issuance to Private Co of 1,361,542 voting common shares of Clearview issued from treasury. The operations of the acquired assets have been included in Clearview’s results commencing on February 22, 2019.

The total consideration paid by Clearview was approximately $9.1 million based on a share price for Clearview of $6.25 per share. Transaction costs of $0.1 million were recorded in earnings.

The acquisition of assets from Private Co has been accounted for as a business combination. The net assets have been allocated as follows:

Acquisition Date	February 22, 2019
Consideration	
Cash consideration	581
Share consideration (1,361,542 common shares)	8,509
Total consideration	9,090
Net assets at estimated fair value	
Working capital	87
Exploration and evaluation assets	182
Property, plant and equipment	10,764
Deferred income tax liabilities	(1,108)
Decommissioning obligations (see Note 9)	(835)
Net assets	9,090

The fair value of property, plant and equipment has been estimated based upon an independently prepared reserves evaluation. The fair value of decommissioning obligations at the time of the acquisition was estimated using a discount rate of 13%.

Oil and natural gas sales of $2.7 million and net operating loss of $0.2 million are included in the statement of operations since the closing date for the 2019 year. If the acquisition had occurred on

January 1, 2019, incremental oil and natural gas sales for the year ended December 31, 2019 would have been $0.5 million (unaudited) and the incremental net operating income for the year ended December 31, 2019 would have been $0.1 million (unaudited).

(c) Disposition of assets

In the year ended December 31, 2020, the Company closed the disposition of a non-operated minor working interest in a natural gas property in its Central Alberta Gas CGU for nil proceeds. No gain or loss was recorded in earnings related to the disposition. The disposition resulted in a reduction of $88 thousand in decommissioning obligations.

In the prior year ended December 31, 2019, the Company closed the disposition of a non-operated minor working interest in a natural gas property in its Central Alberta Gas CGU and the disposition of a royalty interest in 1,257 natural gas wells. Proceeds from the dispositions were $29 thousand, after closing adjustments, resulting in a gain on dispositions of $25 thousand, recorded in earnings. The dispositions included the reduction of $4 thousand in decommissioning obligations.

5. Exploration and evaluation assets

Exploration and evaluation assets (“E&E”) consist of the Company’s exploration projects which are pending the determination of proved plus probable reserves.

As at	December 31, 2020	December 31, 2019
Balance, beginning of the year	405	248
Additions	3	-
Acquisition of E&E assets (see Note 4 (b))	-	182
Expense	(104)	(25)
Balance, end of the year	304	405

Due to the expiry of certain lands in E&E, the Company incurred an expense of $0.1 million during the year ended December 31, 2020 ($25 thousand - year ended December 31, 2019).

6. Property, plant and equipment

(a) Oil and natural gas assets

As at	**December 31, 2020**	December 31, 2019
Cost		
Balance, beginning of the year	**123,969**	111,955
Acquisitions (see Note 4 (a)(b))	**34**	10,780
Asset retirement costs	**2,529**	194
Additions	**635**	1,474
Disposals (see Note 4(c))	**(670)**	(434)
Balance, end of the year	**126,497**	123,969
Accumulated depletion, depreciation and impairment		
Balance, beginning of the year	**(47,882)**	(34,521)
Depletion and depreciation	**(8,067)**	(10,041)
Impairment expense	**(4,300)**	(3,750)
Disposals (see Note 4(c))	**582**	430
Balance, end of the year	**(59,667)**	(47,882)
Net carrying value, end of the year	**66,830**	76,087

The Company does not capitalize any of its general and administrative costs associated with exploration and development activities.

(b) Depletion, depreciation and impairment/reversal

The depletion cost base includes future development costs as appropriate. At December 31, 2020, the Company estimated its future development costs to be $145.7 million (December 31, 2019 - $160.8 million).

At December 31, 2020, Clearview identified indicators of impairment reversal, primarily due to the increase in commodity prices and significant positive technical revisions, due to reduced decline rates and reduced operating costs, since the last impairment test performed on March 31, 2020. As a result, the Company completed an impairment reversal test on two of its three CGU's and determined that the net recoverable amount exceeded the carrying values for the Central Alberta Gas CGU and Central Alberta Oil CGU.

The estimated net recoverable amount was based on before-tax discount rates specific to the underlying reserve category as determined by the Company's independent third-party reserve evaluator at December 31, 2020 and risk profile of each CGU, net of decommissioning obligations. The discount rate used in the valuation was an average of 15%. The impairment reversal tests, using the fair value less costs to sell method, indicated the Central Alberta Gas CGU's recoverable amount was higher than its carrying value resulting in an impairment reversal of $10.9 million and that the Central Alberta Oil CGU's recoverable amount was higher than its carrying value resulting in an impairment reversal of $7.7 million, both recorded as a reversal of impairment in earnings, for a total reversal of impairment of $18.6 million.

At December 31, 2020, Clearview identified indicators of impairment, primarily due to continued production declines with no capital spending directed to its Southern Alberta Oil CGU. As a result, the Company completed an impairment test on the CGU and determined that the net carrying amount exceeded the net recoverable amount for the Southern Alberta Oil CGU.

The estimated net recoverable amount was based on before-tax discount rates specific to the underlying reserve category as determined by the Company's independent third-party reserve evaluator at December 31, 2020 and risk profile of the CGU, net of decommissioning obligations. The discount rate used in the valuation was an average of 15%. The impairment test, using the fair value less costs to sell method, indicated the Southern Alberta Oil CGU's recoverable amount was lower than its carrying value resulting in an impairment of $0.6 million being recorded in earnings.

The following table details the forward pricing used in estimating the recoverable amount of each CGU at December 31, 2020.

Year	WTI US/bbl	Edmonton Light Cdn/bbl	Bow River Medium Cdn/bbl	Propane Cdn/bbl	Butane Cdn/bbl	Pentane Cdn/bbl	AECO Spot Cdn/bbl
2021	47.17	55.76	45.36	18.18	26.36	59.24	2.78
2022	50.17	59.89	48.96	21.91	32.85	63.19	2.70
2023	53.17	63.48	52.91	24.57	39.20	67.34	2.61
2024	54.97	65.76	54.95	25.47	40.65	69.77	2.65
2025	56.07	67.13	56.05	26.00	41.50	71.18	2.70
2026	57.19	68.53	57.16	26.54	42.36	72.61	2.76
2027	58.34	69.95	58.30	27.09	43.24	74.07	2.81
2028	59.50	71.40	59.47	27.65	44.14	75.56	2.87
2029	60.69	72.88	60.66	28.23	45.06	77.08	2.92
2030	61.91	74.34	61.87	28.79	45.96	78.62	2.98
2031	63.15	75.83	63.10	29.37	46.88	80.2	3.04
2032	64.41	77.34	64.37	29.95	47.82	81.80	3.10
2033	65.70	78.89	65.65	30.55	48.77	83.44	3.16
2034	67.01	80.47	66.97	31.16	49.75	85.10	3.23
2035	68.35	82.08	68.31	31.79	50.74	86.81	3.29
2036+	+2.0%/yr	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.

The results of Clearview's impairment tests are sensitive to changes in quantities of reserves and future production, forward commodity pricing as forecast by three independent reservoir engineering companies, development costs, operating costs, royalty obligations, abandonment costs and discount rates. As such, any changes to these key estimates could decrease or increase the recoverable amounts of assets and result in additional impairment charges or in the reversal of previously recorded impairments charges.

As at December 31, 2020, all else being equal, a 1% change in the discount rate or a 5% change in the forecast operating cash flows would result in the following charge to the impairment reversal being recognized.

($ millions)	1% change in discount rate	5% change in cash flows
Central Alberta Gas CGU	0.85	1.16
Central Alberta Oil CGU	1.39	1.17
Southern Alberta Oil CGU	-	0.06
Total	2.24	2.39

At March 31, 2020, due to the decline in current and forward oil, natural gas and natural gas liquids prices, Clearview determined there were indicators of impairment present affecting all of its CGU's. As a result, the Company completed an impairment test on its three CGU's, Central Alberta Gas, Central Alberta Oil and Southern Alberta Oil at March 31, 2020 based on fair value less cost to sell to calculate the estimated recoverable amount of each CGU. The estimated recoverable amount was based on before-tax discount rates specific to the underlying reserve category as determined by the Company's independent third party evaluator as of December 31, 2019 and updated by the Company to March 31, 2020 and risk profile of each CGU, net of decommissioning obligations. The discount rates used in the valuation ranged from 10 to 20 percent. The tests indicated an impairment in all three CGU's. For the Central Alberta Gas CGU, the carrying value exceeded the recoverable amount by $13.8 million, the Central Alberta Oil CGU carrying value exceeded the recoverable amount by $7.0 million and the Southern Alberta Oil CGU carrying value exceeded the recoverable amount by $1.5 million. This resulted in a total impairment of $22.3 million.

The following table details the forward pricing used in estimating the recoverable amount of each CGU at March 31, 2020.

	WTI	Edmonton Light	Bow River Medium	Propane	Butane	Pentane	AECO Spot
Year	US/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/gj
2020	29.17	29.22	19.55	10.04	18.27	34.35	1.74
2021	40.45	46.85	35.07	17.08	29.70	50.72	2.20
2022	49.17	59.27	46.87	23.55	37.87	62.80	2.38
2023	53.28	65.02	51.81	26.03	41.80	68.49	2.45
2024	55.66	68.43	54.85	27.57	44.14	71.73	2.53
2025	56.87	69.81	56.29	28.19	45.02	73.16	2.60
2026	58.01	71.24	57.54	28.83	45.95	74.66	2.66
2027	59.17	72.70	58.82	29.49	46.89	76.19	2.72
2028	60.35	74.19	60.12	30.17	47.86	77.75	2.79
2029	61.56	75.71	61.44	30.85	48.84	79.34	2.85
2030	62.79	77.22	62.67	31.47	49.81	80.93	2.91
2031	64.05	78.77	63.92	32.10	50.81	82.55	2.97
2032	65.33	80.34	65.20	32.74	51.83	84.20	3.03
2033	66.63	81.95	66.50	33.40	52.86	85.88	3.09
2034	67.97	83.59	67.83	34.07	53.92	87.60	3.15
2035+	+2.0%/yr	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.	+2.0%/yr.

As a result of the impairment tests completed during 2020, the Company recognized a net impairment expense of $4.3 million.

At December 31, 2019, Clearview identified indicators of impairment, primarily due to the volatility of natural gas and natural gas liquids prices during the year and forecast commodity prices having declined from the previous year, primarily natural gas and the Company's change in development plans for its Southern Alberta Oil CGU.

The indicators necessitated Clearview to perform an impairment test on its Central Alberta Gas and Southern Alberta Oil CGU's at December 31, 2019 based on fair value less cost to sell to calculate the estimated recoverable amount of each CGU. The estimated recoverable amount was based on before-tax discount rates specific to the underlying reserve category as determined by the Company's independent third-party evaluator as at December 31, 2019 and risk profile of each CGU, net of decommissioning obligations. The discount rates used in the valuation ranged from 15 to 25 percent. The impairment tests indicated the Company's Central Alberta Gas CGU's recoverable amount was less than its carrying value resulting in an impairment of $3.75 million charged to earnings.

The following table details the forward pricing used in estimating the recoverable amount of each CGU at December 31, 2019.

	WTI	Edmonton Light	Bow River Medium	Propane	Butane	Pentane	AECO Spot
Year	US/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl	Cdn/bbl

7. Bank debt

As of December 1, 2020, the Company has a revolving, operating demand loan ("Operating Facility") with an Alberta based financial institution ("Lender") with a facility limit of $15.0 million (December 31, 2019 - $18.5 million). Additionally, Clearview has a $6.25 million term loan through its Lender under the Business Credit Availability Program ("BCAP"), supported by the Export Development Canada ("EDC") Guarantee ("EDC Facility") providing a total credit capacity of $21.25 million.

At December 31, 2020, Clearview had the following outstanding bank debt.

As at	**December 31, 2020**	December 31, 2019
Operating Facility - prime-based loans	**49**	2,825
Operating Facility - guaranteed notes	**5,997**	11,982
EDC Facility	**6,250**	-
Total	**12,296**	14,807

The Operating Facility is reserve-based, revolving and payable on demand. As the available lending limits are based on the lender's interpretation of the Company's reserves and future commodity prices, there can be no assurance as to the amount of available credit that will be determined at each scheduled review. Drawings under the facility can be undertaken in the form of prime-based loans or guaranteed notes offered by the Lender.

The EDC Facility is a non-revolving term facility to be used exclusively to provide additional liquidity for the Company's business operations. The facility can be used to pay operating expenses, G&A expenses, interest on the Operating Facility and pay down temporary advances on the Operating Facility. The EDC Facility cannot be used to repay or refinance permanent reductions to the Operating Facility or to make shareholder contributions, shareholder loans, share buy backs or pay any bonuses or increase executive compensation.

The EDC Facility is payable on demand by the Lender and is non-revolving. The facility has a term of five years with the EDC providing a guarantee to the Company's lender for 80% of the principal amount outstanding. The principal amount outstanding must be repaid no later than 50% at the end of the fourth year with the remaining principal outstanding due for repayment at the end of the fifth year.

The Operating Facility and EDC Facility are secured by a general security agreement providing a security interest over all present and acquired property and a floating charge on all oil and natural gas assets.

The interest rates applicable to drawings under the facilities are based on a pricing margin grid and can change quarterly as a result of the ratio of all outstanding indebtedness to annualized quarterly funds flows as calculated in accordance with the agreement governing the facility ("Debt to Funds Flow"). Annualized quarterly funds flow is defined as earnings before depletion and depreciation, stock based compensation, accretion of decommissioning obligations and debenture discounts, unrealized gains or losses on commodity contracts, gains or losses on dispositions and deferred income taxes.

Under the Operating Facility, prime-based loans are subject to an interest rate of lender prime plus a credit spread of 3.75% to 6.75%, depending on the Debt to Funds Flow of less than 1.0 to greater than 4.0. Effective December 1, 2020, the Company is paying 8.70% (lender's prime rate of 2.45% plus a credit spread of 6.25%) on prime based loans.

Guaranteed notes are subject to the Canadian Dollar Offered Rate ("CDOR") plus a stamping fee of 4.75% to 7.75%, depending on the Debt to Funds Flow of less than 1.0 to greater than 4.0. Guaranteed notes may be undertaken for terms of 30, 60, 90 or 180 days. Effective December 1, 2020, the Company is paying 7.75% (CDOR of 0.50% plus a stamping fee of 7.25%) on guaranteed notes.

Under the EDC Facility, the loan is subject to an interest rate of lender prime plus a credit spread of 3.75% to 6.75%, depending on the Debt to Funds Flow of less than 1.0 to greater than 4.0. Effective December 1, 2020, the Company is paying 8.70% (lender's prime rate of 2.45% plus a credit spread of 6.25%) on the EDC Facility. The Company paid and will be required to pay an upfront fee of 1.8% of the outstanding balance, annually to the EDC.

The Company is subject to certain reporting and financial covenants, pursuant to its lending agreement. The agreement requires compliance with a working capital covenant whereby the Company must maintain a minimum working capital ratio of 1 to 1. For calculating compliance with this covenant, the amount drawn on the Operating Facility and EDC Facility, classified as a current liability, and the fair value of financial instruments are excluded from working capital. Conversely, the amount of the undrawn portion of the Operating Facility is added to current assets. At December 31, 2020, the Company's working capital ratio for purposes of the lender's working capital covenant was 4.0:1 (1.8:1 at December 31, 2019). In addition, the Company and its lender have agreed to a covenant whereby the Company shall maintain a liability management rating ("LMR") of no less than 2.0. Clearview's LMR as at December 31, 2020 was 2.2. In addition, the Company will now be required to maintain commodity swap contracts for 50% (approximately 3,400 GJ per day) of its natural gas production volumes and 300 barrels per day of its oil production volumes through to the next annual review date. The Company has satisfied the requirement to contract a portion of its production volumes as per the lending agreement.

At December 31, 2020, the Company had $6.0 million of guaranteed notes, $49 thousand in prime-based loans and $10 thousand in letters of credit outstanding on the Operating Facility and $6.25 million outstanding on the EDC Facility.

The next credit review is scheduled to be completed by no later than October 31, 2021. In the event that the Operating Facility limit is reduced and the amount outstanding exceeds this facility limit, the Company shall have thirty days to repay any shortfall.

8. Convertible debentures

	Number of Convertible Debentures	Liability Component	Equity Component
Issuance of convertible debentures	12,621	1,193	69
Deferred income tax liability	-	-	(16)
Accretion of discount	-	1	-
Balance at December 31, 2020	12,621	1,194	53

On December 1, 2020, the Company issued $1.26 million of unsecured convertible debentures at a price of $100 per debenture. The interest rate on the debenture is 10%, payable quarterly in arrears on March 31, June 30, September 30 and December 31 of each year. During the term of the debenture, the debenture is convertible into common shares of the Company at the option of the holder based on a conversion price of $1.50 per common share. Due to the conversion feature of the debenture, for accounting purposes the debentures were bifurcated between debt and equity using a discount rate of 11.5% for a debt value of $1.19 million with the remainder recognized in shareholders' equity as the equity component of the convertible debentures.

The debentures have a term of five years and mature on November 30, 2025. The debentures may not be redeemed by the Company prior to December 1, 2021. During the remainder of the term, the Company may redeem the debentures over the term based on the following basis:

Year 2 – 110% of the principal amount plus accrued interest
Year 3 – 105% of the principal amount plus accrued interest
Years 4 and 5 – 100% of the principal amount plus accrued interest

The subscribers to the debenture offering consisted of current shareholders of the Company, with the directors and officers of the Company participating in the offering.

9. Decommissioning obligations

The following table presents the continuity of the Company's decommissioning obligations.

As at	**December 31, 2020**	December 31, 2019
Balance, beginning of the year	**23,842**	22,645
Disposition of obligations (see Note 4 (c))	**(88)**	(4)
Obligations settled	**(136)**	(289)
Acquisition of obligations (see Note 4 (a)(b))	**296**	835
Changes in estimates	**2,529**	198
Accretion (see Note 11)	**286**	457
Total	**26,729**	23,842
Current portion of decommissioning obligations	**(342)**	(422)
Balance, end of the year	**26,387**	23,420

The future estimated cash outflows required to settle the obligations have been discounted using a risk-free rate of 1.21% at December 31, 2020 (December 31, 2019 at 1.74%). An inflation rate of 1.49% at December 31, 2020 (December 31, 2019 at 1.33%) was used as an estimate to determine the future cash outflows required to settle the obligations. The total undiscounted and inflated amount of future cash outflows as estimated at December 31, 2020 was $33.3 million (December 31, 2019 - $31.9 million). Payments to settle decommissioning obligations occur over the operating lives of the underlying assets, estimated to be over the next 47 years, with most of the expected expenditures to be incurred between 2029 and 2050.

The lower discount rate and higher inflation rate at December 31, 2020, relative to the prior year, resulted in an increase in decommissioning obligations of $2.5 million, outlined as a change in estimates in the table above.

Decommissioning obligations assumed as part of the 2019 acquisition in Note 4(b) were initially measured at fair value using a credit adjusted risk free rate of 13 per cent for a total of $0.8 million. The reduction to a risk-free rate of 1.9% at the end of the first quarter resulted in an increase in the obligation of $4.8 million which is a component of the change in estimates in the above table.

In the prior year, the lower discount rate and inflation rate at December 31, 2019 resulted in a reduction in decommissioning obligations of $4.6 million, almost completely offsetting the change in estimate of $4.8 million related to the 2019 acquisition in Note 4(b) for a total change in estimate of $0.2 million in the year.

During the year ended December 31, 2020, the Company incurred $136 thousand in abandoning 6 gross (3.5 net) wells. Pursuant to the Company's enrollment in the Area Based Closure ("ABC") program for the abandonment of inactive wells, sites and facilities, the Company was required to spend approximately $0.4 million in decommissioning obligations in 2020. On June 17, 2020, the Alberta Energy Regulator suspended the inactive liability reduction target for the remainder of 2020 and subsequently informed industry that expenditures incurred in 2020 would be recognized towards the required ABC expenditures for 2021. The Company has reflected the net remaining 2021 expenditures of $0.3 million as a current liability on the balance sheet.

10. Share capital

(a) Authorized shares

Unlimited voting common shares – without nominal or par value
Unlimited non-voting common shares – without nominal or par value
Unlimited preferred shares with multiple classes – par value of $1.00

(b) Issued voting common shares

	#	$
Balance, December 31, 2018	10,309,845	66,494
Issue on acquisition of assets (Note 4 (b))	1,361,542	8,509
Balance, December 31, 2019 and 2020	**11,671,387**	**75,003**

(c) Contributed surplus

For the year ended December 31, 2020, the Company cancelled 804,000 options held by officers, employees and directors. The stock based compensation associated with cancelled, unvested options in the amount of $72 thousand has been accelerated and recorded in earnings.

The following table presents the continuity of contributed surplus.

As at	**December 31, 2020**	December 31, 2019
Balance, beginning of the year	**3,202**	2,368
Stock based compensation	**378**	834
Balance, end of the year	**3,580**	3,202

(d) Per share amounts

For the years ended December 31, 2020 and December 31, 2019, options for voting common shares were excluded from the computation of diluted per share amounts and for the year ended December 31, 2020, the conversion of convertible debentures into common shares and deferred share units was excluded from the computation of diluted per share amounts as the Company was in a loss position for each of those years.

The net loss per voting common share was determined as follows:

	Year ended December 31, 2020	Year ended December 31, 2019
Net loss	**(10,842)**	(8,768)
Weighted average shares outstanding – basic and diluted	**11,671,387**	11,471,881
Net loss per voting common share – basic and diluted	**(0.93)**	(0.76)

(e) Options for voting common shares

The Company has provided for equity-settled, share based payments in the form of options to acquire voting common shares which the Board of Directors has granted to directors, officers and employees. The numbers of options, the exercise price and all other terms thereof were set by the Board of Directors at the time of grants. The options vest 1/3 on the first anniversary of the grant date, 1/3 on the second anniversary and 1/3 on the third anniversary. The options expire seven years from the date of grant.

In the year ended December 31, 2020, the Company granted 321,600 options (year ended December 31, 2019 – nil) to officers, employees and directors with an exercise price of $1.25 per share under option.

The fair value of the options at the date of measurement was determined based on a Black-Scholes calculation with the following inputs and outcomes:

	Year ended December 31, 2020
	Inputs
Exercise price	**$1.25**
Volatility	**83%**
Expected option life	**6.5 years**
Dividend	**$nil**
Risk-free interest rate	**0.51%**
Estimated cost per voting common share under option	**$1.11**
Total estimated cost to be amortized over the vesting period	**$357**

The following presents the continuity of the voting common shares under option.

	Number of shares under option	Weighted average exercise price
Balance, December 31, 2018	1,122,001	$4.83
Expired	(60,834)	$4.75
Balance, December 31, 2019	1,061,167	$4.83
Granted	321,600	$1.25
Expired	(10,667)	$4.86
Cancelled	(804,000)	$4.88
Balance, December 31, 2020	**568,100**	**$2.74**

The following table summarizes the options outstanding and exercisable at December 31, 2020.

Outstanding			Exercisable		
Number of shares under option	Remaining contractual life (Years)	Weighted average exercise price	Number of shares under option	Remaining contractual life (Years)	Weighted average exercise price
246,500	2.86	$4.69	246,500	2.86	$4.69
321,600	6.90	$1.25	-	-	-
568,100	**5.14**	**$2.74**	**246,500**	**2.86**	**$4.69**

(f) Deferred share units

For the year ended December 31, 2020, the Company granted 79,540 deferred share units ("DSU's") to officers and directors. The DSU's are granted as a long-term incentive program and entitle the holder to receive the underlying number of shares of the Company's common shares when settled. The DSU's are to be settled at the retirement, resignation or death of the holder of the DSU's.

The following table presents the continuity of deferred share units.

As at	**December 31, 2020**	December 31, 2019
Balance, beginning of the year	**-**	-
Grants	**79,540**	-
Balance, end of the year	**79,540**	-

11. Finance costs

	Year ended December 31, 2020	Year ended December 31, 2019
Accretion of decommissioning obligations (see Note 9)	**286**	457
Accretion of convertible debenture discount (see Note 8)	**1**	-
Interest on bank debt	**963**	1,074
Interest on convertible debentures	**11**	-
Interest rate swaps	**36**	-
Credit facility fees and costs	**360**	76
Total	**1,657**	1,607

12. Revenues

The Company derives its revenue from contracts with customers for oil and natural gas sales through the transfer of commodities at particular sales points and for processing income through the provision of services at particular facilities. All revenue of the Company is generated through sales in Alberta.

Oil and natural gas sales are comprised of the following major product types.

	Year ended December 31, 2020	Year ended December 31, 2019
Crude oil	**7,292**	16,152
Natural gas liquids	**2,983**	4,503
Natural gas	**5,858**	5,032
Total	**16,133**	25,687

13. Other costs

Other costs consists of the following:

	Year ended December 31, 2020	Year ended December 31, 2019
Bad debt provision	**256**	-
Site rehabilitation program grant income	**(51)**	-
Total	**205**	-

During the year ended December 31, 2020, approximately $0.5 million was awarded as a grant to the Company through the Alberta Site Rehabilitation Program (“SRP”) to pay service companies to complete abandonment and reclamation operations. In 2020, the Company received $51 thousand, representing its working interest share, of $92 thousand of grant funds for abandonment and reclamation operations undertaken on 5 gross (2.9 net) wells. The remaining grants are eligible to be applied to abandonment and reclamation operations undertaken in 2021.

14. Supplemental cash flow information

Changes in non-cash working capital are comprised of:

	Year ended December 31, 2020	Year ended December 31, 2019
Cash provided by (used in):		
Trade and other receivables	**216**	(582)
Prepaid expenses and deposits	**(34)**	42
Accounts payable and accrued liabilities	**(908)**	(964)
	(726)	(1,504)
Related to:		
Operating activities	**(568)**	(225)
Investing activities	**(158)**	(1,279)
Changes in non-cash working capital for the year	**(726)**	(1,504)

15. Risk management and financial instruments

(a) Overview of risk management

The Company’s activities expose it to a variety of financial risks that arise from its exploration, development, production and financing activities. The risks include credit risk, liquidity risk and market risk. The Company employs risk management strategies and polices to ensure that any exposure to risk complies with the Company’s business objectives and risk tolerance levels. While the Board of Directors of the Company has the overall responsibility for the establishment and oversight of the Company’s risk management framework, management has the responsibility to administer and monitor these risks.

(b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's accounts receivable are substantially due from oil and natural gas marketers and industry partners.

The Company's operations are conducted in Canada. The Company's exposure to credit risk is based on the credit worthiness of each customer, however, changes in industry conditions that negatively impact its customers' ability to generate cash flow will increase the risk of not collecting receivables. Management believes the risk is mitigated by the size and reputation of the companies to which credit is extended.

The Company currently markets its production to two oil and natural gas marketers and monitors the credit rating of those marketers. Revenues from the sale of oil and natural gas are normally collected on the 25th day of the month following production.

The Company has an allowance for doubtful accounts as at December 31, 2020 of $0.3 million (December 31, 2019 - $80 thousand). When determining whether past due accounts are collectible, the Company factors in the credit history of the counterparties. The Company considers amounts outstanding more than 90 days as past due. The maximum exposure to credit risk is the amount of trade and other receivables comprised of the following carrying amounts, of which $0.2 million (December 31, 2019 - $0.3 million) was greater than 90 days.

As at	**December 31, 2020**	December 31, 2019
Oil and natural gas revenue	**1,712**	1,940
Industry partners	**1,012**	1,000
Total trade and other receivables	**2,724**	2,940

(c) Market risk

Market risk is the risk that changes in market prices, such as commodity prices, interest rates and foreign exchange rates will affect the Company's earnings or the value of financial instruments. The objective of the Company is to manage and mitigate market risk exposures within acceptable limits, while maximizing returns.

Commodity price risk

The nature of the Company's operations results in exposure to fluctuations in commodity prices. Commodity prices for oil and natural gas are impacted by global economic and political events that dictate the levels of supply and demand. Management continuously monitors commodity prices and contracts to manage exposure to these risks when it deems appropriate. The Company does not utilize derivative financial instruments for trading or speculative purposes.

The Company hedges a portion of oil and natural gas sales using derivative financial instruments or may use forward sales contracts or physical sales contracts when deemed appropriate. The Company does not apply hedge accounting for these contracts. The Company's production is usually sold using "spot" or near-term contracts, with prices fixed at the time of transfer of custody or based on a monthly average market price.

The following financial commodity price contracts were contracted with the same Alberta based financial institution with which the Company has its credit facility (see Note 7). The Company had the following financial commodity price contracts outstanding at December 31, 2020.

Commencement Date	Expiry Date	Units	Volume	Underlying Commodity	Fixed Price
January 1, 2021	March 31, 2021	GJ/day	1,000	AECO 5A – Financial	$2.91
January 1, 2021	March 31, 2021	GJ/day	1,000	AECO 5A – Financial	$2.79
January 1, 2021	October 31, 2021	GJ/day	1,000	AECO 5A – Financial	$2.43
January 1, 2021	December 31, 2021	GJ/day	1,000	AECO 5A – Financial	$2.10
April 1, 2021	October 31, 2021	GJ/day	2,000	AECO 5A - Financial	$1.86
January 1, 2021	October 31, 2021	Bbls/day	100	Edmonton Par - Financial	$49.45
January 1, 2021	October 31, 2021	Bbls/day	100	Edmonton Par - Financial	$52.05
January 1, 2021	December 31, 2021	Bbls/day	150	US WTI – Call option	$65.00 **

** The Company sold a call option for 2021 on 150 barrels per day at US $65.00 per barrel and transferred the value for selling the call into the financial hedge for US $58.05 per barrel.

The mark to market value of the instruments contracted and outstanding at December 31, 2020 was an unrealized loss of $0.4 million, classified as a current liability (at December 31, 2019 – unrealized loss of $0.2 million). The change in the mark to market value during the year ended December 31, 2020 resulted in an unrealized loss of $0.2 million (year ended December 31, 2019 – unrealized loss of $0.3 million) which was recorded in the statement of operations. The realized gain for the year ended December 31, 2020 was $1.2 million (year ended December 31, 2019 – realized gain of $49 thousand).

A 1% difference in oil prices for the year ended December 31, 2020 would have increased or decreased oil and natural gas revenue by $0.1 million depending on the direction of the difference and a consequential impact on royalties. The net impact of a 1% difference on loss before income taxes is estimated to be $0.1 million.

Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate due to changes in market interest rates. The Company has a variable rate credit facility outstanding and consequently the Company is exposed to interest rate risk. The Company had the following financial interest rate swaps outstanding as of December 31, 2020. The realized gains or losses on the interest rate swaps are recorded in finance costs on the statement of operations (see Note 11).

Commencement Date	Expiry Date	Notional Amount	Underlying Commodity	Fixed Rate
April 1, 2020	March 31, 2021	$3,000,000	CDOR - Financial	1.41%
April 1, 2020	March 31, 2021	$3,000,000	CDOR - Financial	1.20%

A change in the interest rate of 1% during the period ended December 31, 2020 would have increased or decreased interest expense depending on the direction of the change. The impact of a 1% change on interest expense and loss before income taxes is estimated to be $0.14 million.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by monitoring cash flows from operating activities, reviewing actual capital expenditures against budget, managing maturity profiles of financial assets and liabilities and managing its commodity price risk management program. These activities ensure sufficient funds are available to meet the Company's financial obligations when due.

The Company's financial liabilities at December 31, 2020 which mature within one year are as follows:

	Amount
Bank debt	12,296
Accounts payable and accrued liabilities	2,767
Current portion of decommissioning obligations	342
Financial instruments	433
Total	15,838

Management prepares an operating and capital budget for presentation to the Board of Directors of the Company and its lender. Management presents quarterly updates of the operating (including hedge contracts) and capital budgets (including potential acquisitions and dispositions) to the Board of Directors of the Company and adjustments to planned activities are made depending on projected cash flows and capital resources.

The Company's credit facilities are demand loans and as such the lender could demand repayment at any time. As the available lending limits are based on the lender's interpretation of the Company's reserves and future commodity prices, there can be no assurance as to the amount of available credit that will be determined at each scheduled review. Management is not aware of any indications the lender would demand repayment in the next 12 months. At December 31, 2020, the Company had made all its interest and fee payments and was compliant with all the financial covenants. The lender's next review is scheduled to be completed by no later than October 31, 2021. Depending on the final credit facility limit approved by the lender, the Company may seek alternate financing arrangements, if necessary, to execute its planned capital program. Given that the credit facility is a demand loan and the uncertainty regarding the renewal amount and terms, there is liquidity risk for the Company.

(e) Capital management

The Company's objective is to maintain access to sources of capital, defined to be working capital, shareholders' equity, its credit facilities, convertible debentures and cash flow from operations, with which to finance its operations. The Company maintains a capital structure of equity and debt as appropriate. The Company manages its capital structure and revises the structure for changes in economic conditions, opportunities for accretive acquisitions and the risk characteristics of the underlying investments. The Company balances its overall capital structure through share issues and the use of

debt as deemed appropriate in the circumstances. The Company is not subject to any externally imposed capital requirements other than the working capital covenant associated with its credit facility.

The Company's credit facility requires compliance with a covenant whereby the working capital ratio can be no less than 1:1 as outlined in Note 7. At December 31, 2020, the Company's working capital ratio for purposes of the lender's working capital covenant was 4.0:1, (as at December 31, 2019 1.8:1).

The Company monitors net debt in managing its capital. Net debt is defined as current assets less current liabilities, excluding the fair value of its commodity contracts, less convertible debentures.

The components of the Company's net debt calculation are as follows:

As at	**December 31, 2020**	December 31, 2019
Trade and other receivables	**2,724**	2,940
Prepaid expenses and deposits	**640**	606
Bank debt	**(12,296)**	(14,807)
Accounts payable and accrued liabilities	**(2,767)**	(3,675)
Current portion of decommissioning obligations	**(342)**	(422)
Convertible debentures	**(1,194)**	-
Net debt	**(13,235)**	(15,358)

(f) Fair value

The carrying value of trade and other receivables and accounts payable and accrued liabilities included in the statement of financial position approximate fair value due to the short-term nature of those instruments. The fair value of the bank debt approximates its carrying value as it bears a floating rate of interest and the margin charged by the lenders is indicative of current credit spreads. The fair value of the convertible debentures approximates its carrying value based on similar instruments derived from quoted indices. Fair value is measured on the following basis:

Level 1 fair value measurements are based on unadjusted quoted market prices.
Level 2 fair value measurements are based on valuation models and techniques where the significant inputs are derived from quoted indices.
Level 3 fair value measurements are based on unobservable information.

The fair value of financial instruments are measured using level 2 inputs.

16. Income taxes

(a) Income tax rate reconciliation

The provision for income taxes varies from the amounts that would be computed by applying the effective Canadian federal and provincial income tax rates to the loss before income taxes as follows:

	Year ended December 31, 2020	Year ended December 31, 2019
Loss before income taxes	**(10,858)**	(9,876)
Expected future income tax rate	**24.0%**	26.5%
Expected income tax recovery	**(2,606)**	(2,617)
Differences resulting from:		
Permanent differences	**92**	223
Tax rate change and other	**105**	2,347
Change in unrecognized deferred tax assets	**2,393**	(1,061)
Income tax recovery	**(16)**	(1,108)

On June 29, 2020, as part of the Alberta Recovery Plan, the Government of Alberta accelerated the reduction of the general corporate income tax rate to 8% from January 1, 2022 to July 1, 2020.

(b) Movement in deferred tax balances during the year

The following table presents the movement in the deferred tax asset for the periods ended December 31, 2020 and 2019:

Year ended December 31, 2020	Opening Balance	Earnings	Other	Closing Balance
Property, plant & equipment	-	16	-	16
Decommissioning obligations	-	-	-	-
Share issue costs	-	-	-	-
Convertible debentures	-	-	(16)	(16)
Non-capital losses	-	-	-	-
Other	-	-	-	-
Total	-	16	(16)	-
Year ended December 31, 2019	**Opening Balance**	**Earnings**	**Other**	**Closing Balance**
Property, plant & equipment	(6,756)	7,864	(1,108)	-
Decommissioning obligations	2,019	(2,019)	-	-
Share issue costs	42	(42)	-	-
Non-capital losses	4,712	(4,712)	-	-
Other	(17)	17	-	-
Total	-	1,108	(1,108)	-

Deferred income tax assets have not been recognized in respect of the following deductible temporary differences:

Temporary differences	**December 31, 2020**	December 31, 2019
Property, plant and equipment	**10,098**	11,376
Decommissioning obligations	**26,730**	23,842
Share issue costs	**25**	92
Non-capital loss carried forward	**71,184**	62,528
Capital losses	**7,964**	7,964
Other	**433**	224
Total	**116,434**	106,026

(c) Non-capital losses carried forward

The Company has non-capital losses of $71.2 million expiring over the years 2024 to 2040.

17. Commitments

The Company is committed to future minimum payments for natural gas transmission and office space. The Company has a lease for office space which expires June 30, 2021 and may be cancelled by either the Company or the landlord on one month's notice to the other party. Payments required under these commitments for each of the next five years are as follows:

	2021	2022	2023	2024	2025	Total
Gas transportation	7	3	-	-	-	10
Office leases	54	-	-	-	-	54
Total	61	3	-	-	-	64

18. Supplemental information

(a) Key management personnel compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company. The key management personnel compensation is comprised of the following:

	Year ended December 31, 2020	Year ended December 31, 2019
Salaries, benefits and severance	**538**	793
Stock based compensation	**241**	650
Total	**779**	1,443

Stock based compensation, included in the table above, represents the amortization of stock based compensation costs associated with options for voting common shares granted to directors and key management personnel.

(b) Presentation - Statement of operations and comprehensive loss

In the Company's statement of operations and comprehensive loss, items are primarily disclosed by nature except for cash compensation to Company personnel, which were classified as follows:

	Year ended December 31, 2020	Year ended December 31, 2019
General and administrative	**984**	1,238
Operating	**123**	132
Total	**1,107**	1,370

During 2020, the Company received $0.2 million through the Government of Canada sponsored Canada Emergency Wage Subsidy program. This amount is reflected in earnings as an offset to general and administrative expenses.
